PROFESSIONAL SUMMARY

B.Tech Computer Science student and Full-Stack Developer with hands-on experience building real-world web applications using HTML, CSS, JavaScript, Flask, Django, Node.js, and Supabase. Experienced in developing AI-powered platforms, including an ATS resume tracker, job matcher, and LLM-based MCQ generator. Passionate about creating responsive, user-friendly applications and applying AI/ML to solve real-world problems.

EDUCATION

B.Tech - (Computer Science & Technology), 2024-2028
LJ University, Ahmedabad

TECHNICAL SKILLS

Programming Languages: HTML, Java, JavaScript, Python
Frontend & Databases: HTML5, CSS3, Responsive Web Design, Supabase, MongoDB, SQLite, UI&UX Design
Frameworks & Libraries: Flask, React, Django, Node.js, Express, FastAPI
AI / Machine Learning: Llama 3, Groq LLM API, Random Forest, TF-IDF, Scikit-learn, Pandas
Tools & Platforms: Git, GitHub, VS Code, Browser Developer Tools
Other Skills: REST API Integration, Microservices Architecture, Authentication & Security

PROJECTS

CareerCompass – AI-Powered ATS Resume Tracker & Job Matcher June 2026

Tech Stack: React.js, Node.js, Django, Groq LLaMA 3.1, Scikit-learn

Architected a dual-service platform splitting core app logic from AI/ML processing for faster, independent scaling. Applied NLP (Groq LLaMA 3.1) and machine learning (Random Forest and TF-IDF) to automate resume screening and job matching. Designed secure authentication and a two-sided portal experience for candidates and recruiters.

AI PDF-to-MCQ Generator March 2026

Tech Stack: FastAPI, React, Llama 3, Groq

Built an LLM-powered assessment system that processes large PDFs into adaptive multiple-choice questions at scale, with streaming-based extraction, JWT authentication, retry handling, and usage analytics for reliable performance under load. Integrated an AI tutor, flashcards, leaderboard tracking, and wrong-answer analysis workflows to support adaptive learning.

Begin2Code – Coding Learning Platform January 2026

Tech Stack: HTML, CSS, JavaScript, Python, Flask, Supabase

Developed a coding education platform designed for beginner programmers, with responsive frontend interfaces optimized for multiple devices and integrated database and backend functionality for dynamic user interactions. Successfully deployed the application as a working product.

CERTIFICATES

Exploratory Data Analysis for Machine Learning, Issued by IBM May 2026

Introduction to HTML, CSS & JavaScript, Issued by IBM December 2025

Inheritance and Data Structures in Java, Issued by Penn University July 2025

Introduction to Java, Issued by LearnQuest December 2024
